

ThinkYoSelf Classic (\$TYSC) Meme Whitepaper

"The Only Meme Coin That Asks: 'Wait, Why Are We Like This?'"

EXECUTIVE SUMMARY

\$TYSC is a revolutionary digital asset that combines:

- 30% existential crisis
- 50% meme magic
- 20% "wait, this might actually work?"
- 100% unlicensed financial thought experiments

Our thesis: *If Dogecoin can moon because of a tweet, we can moon because of sheer confusion.*

REAL-WORLD "ASSETS"

Phase 2 includes purchasing:

- A struggling mall kiosk to be rebranded as "The Degen Den"
- An abandoned gas station converted to "HODL-Mart"
- One (1) slightly used Monopoly board as our "real estate portfolio"

"Property rights are just NFTs you can't right-click save"

TOKENOMICS (TYPOS INTENTIONAL)

Feature	Technical Term	What It Actually Means
Supply	1,000,000,000 \$TYSC	"Enough for you and your 10 alt accounts"
5% Tax	"Ecosystem Fund"	"Our team's collective pizza budget"
Locked Liquidity	"Security Measure"	"We threw the keys into a volcano (metaphorically)"

Special Mechanism:

Every time someone says "wen lambo," 0.0001% of supply is burned. *This is financial innovation.*
